

MALIK TRADING CO
TYRE IMPORTER & DISTRIBUTOR

CORPORATE **PROFILE**

INTRODUCTION & HISTORY

Malik Trading Co. (MTC) established its operation in 1984 from a small town Talagang District Chakwal in Pakistan, as a small trading company and later in early 1990's, it became sole distributor and wholesaler. By 1998, Malik Trading Co. became the tyre importer, mainly dealing in Turkish, Thai and Chinese tyres and became their authorised agent in Pakistan. Today MTC is one of the biggest tyres importer company in Pakistan with well known reputation and goodwill in tyre/transport industry.

It was a modest start within the family concern, but with honest efforts and utmost dedication, the business volume and reputation has gradually but steadily enhanced by the passage of time. Imbued with the spirit of continuous growth and carefully designed business expansion in focus, Malik Trading Co. registered itself as a company playing a pivotal role in transport industry.

MTC Head Office is in Karachi and site offices in Talagang and Islamabad. The main warehouse is in Karachi from where the tyres are distributed throughout Pakistan. MTC deals in all segment of tyres, i.e. Truck & Bus Tyres (TBR) both Radial and Bias, Light Truck Tyres (LTR) both Radial and Bias, Off-The-Road Tyres (OTR) both Radial and Bias, Agriculture Tyres, Industrial Tyres, Military Tyres, Special Tyres and Passenger Car Tyres (PCR). Currently more than 200 different sizes are available, biggest size range by any importer in Pakistan.

We are enclosing the following publications for your information:

- Regulation Part 574
- Federal Motor Vehicle Safety Standards Nos. 119 and 120

The use of the DOT symbol molded into or onto a tire constitutes a certification by the manufacturer and signifies that the tire meets applicable Federal safety requirements. While it is not required that tires be tested prior to using the DOT symbol, the National Highway Traffic Safety Administration does maintain a compliance test program to enforce safety standards. And any tires that are found not to meet the Federal standards, are subject to civil penalties of up to \$1000 per tire but not to exceed \$100,000 for any related series of violations.

E-MARK

ADVANCE & SAMSON TYRE

China's 60th National Day Military Parade

MAGNUM & VEE RUBBER TYRE

Vee Rubber was formed in 1977 as a manufacturer of bicycle and motorcycle tires and tubes, by CEO Vitorn Sukanjanapong. Its sales quickly spread throughout Asia, Western Europe, USA, Canada, the Latin American countries, and other corners of the world. Vee Rubber has more than 10 branches situated all over the world, now employing in excess of 4000 people. Vee Rubber has also invested more than 100 million US dollars in its domestic market. Recognition of Vee Rubber's outstanding performance is evidenced by the 1995 and 1998 Prime Ministers Export Awards. In particular market segments, Vee Rubber Group is now known worldwide. Many customer brands also achieve recognition, although indirectly. The Group supplies to several Japanese motorcycle manufacturers for OEM and replacement sales.

From Superior Raw Materials to Superior Products

Supported by the Thai Board of Investment Promotional Privileges, Vee Rubber operates three large manufacturing facilities on the outskirts of Bangkok. Its combined annual production exceeds 25 million tires. With more than a quarter of a century of experience and commitment to constant development, Vee Rubber ensures that its manufacturing standard is second to none, combining its skill and technology to manufacture superior quality tires

Commitment to Continuous Development

The group is firmly committed to continuous development of its manufacturing efficiency and quality. Only selected raw materials that meet or exceed our extensive specifications and close scrutiny is paid during production to ensure a consistent quality standard. Vee Rubber's manufacturing processes achieve ISO 9000 certification. Compound ingredients, tire design, and tread performance, as well as quality assurance are closely supervised by a team of engineers, with overseas and local experience, using modern computer controlled equipment. The Group headquarters is well situated in a convenient location in Bangkok, equipped with modern IT and telecommunication facilities, with focused teams geared towards fast and efficient communication with clients all over the world.

Products & Sales Performance

Vee Rubber makes a wide variety of products, both tires and tubes as follows:

Motorcycle Tires: for circuit racing, highway use, MotoX racing, Quad sport, utility, and racing

Bicycle Tires: For all General used and also competition, including BMX

Passenger Tires: Steel belted Radial for cars, pickup trucks, vans, and 4x4, now including low profile and competition tires.

Bias Truck Tires: for large and medium sized trucks to cover all applications

Good value products and targeted marketing ensure group sales in more than 100 countries around the world. Sales have steadily grown over the last five years yielding annual revenue of around 75 million U.S. dollars. Approximately ninety percent of group sales are exported, whilst the remaining ten percent is supplied to the domestic market.

EMARK

RUNWAY TYRE

Headquartered in Singapore - Giti Tire is a global tire company, offering a complete range of quality tires and services - delivering to more than 130 countries worldwide and ranked 10th globally in yearly revenue by Tyre Press. Over 32000 Employees in 20 countries, 5 Research Centers worldwide (UK, USA, Germany, Indonesia & China). 7 worldwide manufacturing facilities (USA, China, Indonesia). Over 65000 Retail Points worldwide.

Quality Control Systems

Runway tires, produced by Giti Tire, are put through one of the most rigorous and comprehensive quality control systems in the industry, in order to ensure a high quality and safe driving experience. Headquartered in Singapore, Giti Tire's production manufacturing facilities make many millions of tires each year for sale in more than 130 countries, ensuring a highly experienced process from the material to the final tire that goes onto your vehicle.

Giti Tire has implemented a comprehensive quality control system at all of its tire plants, that meet all global standards. The company conducts inspections at each stage of the production process to ensure that each component meets relevant specifications and standards.

Giti subjects tires to a final personal inspection before packaging them for delivery. With the use of an internal numbering system, the factories and distribution centers are able to monitor the employee group responsible for a particular production process, for each tire that is produced. If there are any defects, no matter how small, the tire will not be released for sale.

All Runway tires include a single barcode located on the tire's sidewall, allowing for tracing from the raw materials used, all the way to the final product.

Environmental, Health, and Safety Certifications

Giti Tire is dedicated to keeping the highest health and safety standards for employees and customers. All production plants have obtained ISO/TS16949:2002 (the highest standard of quality control) and ISO14001 Environmental Management System accreditations, ensuring the company's status as one of the largest and most advanced in the world.

In addition to a focus on operational excellence and efficiency, Giti's system of excellence also stresses on the importance of employee health and safety in the workplace, as well as environmental sustainability. This is done by keeping tight controls on material use, as well as reducing natural resources and increasing tire reuse.

A Meticulous and Complex Production Process

Tire production requires the best people, materials, machines, and processes, and Giti Tire employees are passionate about building a better and safer tire. An extensive production and testing system allows tires to be produced from raw materials through a process of mixing, building, curing, and testing. Giti focuses on the development of equipment, processes, and knowledge to keep a top level of quality in today's competitive tire marketplace.
